

*My dog got loose from a broken snap bolt, could yours be next? It's more common than anyone realizes. Is your dog's leash secure? Did you ever have a dog leash break or come undone?*

When I was growing up, we had a Great Dane and a Boxer. Yes the leash broke a couple times because each dog had it's own strength, lol :)

I have never had a leash break, but I had a collar that failed.

I have had a latch break on me, but luckily I was at home getting ready before the walk.

Yes I have had it happen. I would love to get this for my daughter's new puppy!

I did have a latch break on my dog when I had her outside one day. Fortunately she didn't realize until after I had grabbed her collar or she would have been long gone.
